Justice Department,

It is my opinion that it is in the best interest of the United States to end Clinton-era Anti-trust law abuse. Microsoft got to where they are by hard work and American free enterprise. They should not be penalized for being an over achiever. They have a line of great products that greatly enhances American business and personal use of computers. For example: if a cow produces more milk the farmer does not reduce its amount of feed. No; he gives it more grain thus encourages it to produce more milk! By penalizing Microsoft you are telling other businesses not to over produce least they face the same consequences thereby limiting economic growth.
